

IMPORTANT NUMBERS YOU SHOULD KNOW

GREAT R-VALUE INSULATOR!

- **R-Values up to 18.1**
1" RetroFoam™ at 25°= R 4.6, at 75°= R 4.1
3.625" stud cavity 5 x 3.625 = R 18.1

GREAT FIRE RETARDANT!

- **CLASS 1 FIRE RATING**
Surface Burning Characteristics (ASTME 84)
This numerical flame spread rating is not intended to reflect hazard presented by this or any other material under actual fire conditions.

GREAT SOUND REDUCER!

- **45 - 50 db loss on average**

ALL NEW... GOT MOLD? WE HAVE THE ANSWER

Mold can present a number of health risks to you and your family. Studies have found that nearly all chronic sinus infections as well as a tripling of the asthma rate are linked to mold. With \$40,000 being the average cost for mold remediation Retrofoam™ has found the solution.

RETROFOAM™ TECHNOLOGY

SAFE, AFFORDABLE AND EFFICIENT INSULATION

With energy costs expected to rise 15-30% in many areas of the country, RetroFoam™ foamed-in-place insulation will literally pay for itself by reducing your utility bills. Whether your walls are uninsulated or poorly insulated, RetroFoam™ will maximize the R-Value of your walls. R-18 in standard stud wall vs. R-13 for fiberglass batting. This reduces the amount of heat or cooling that escapes through the walls. RetroFoam™ also prevents air infiltration by sealing all wall cracks and crevices where air can enter or leave your home. All of which saves you money.

FAST AND EASY

NO MORE MESSY CLEANUP

Installation of RetroFoam™ foamed in place insulation is a breeze in any type of block or frame construction. Typically, installation is completed within a day. Since it can be installed from the outside, it is unintrusive... no tearing out walls, no moving furniture or interior clean up. And RetroFoam™ installation technicians will leave the outside neat and clean, too!

SAFE FOR THE ENVIRONMENT

SAFE FOR YOUR FAMILY

Non-toxic and completely safe, RetroFoam™ produces no fumes, gases or emissions that may be created by other types of insulation products. That's good for the environment and your family.

RETROFOAM™ MAKES YOU COMFORTABLE.

INSIDE.

FIRE RETARDANT AND PEST RESISTANT

In addition to the superior insulation value of RetroFoam™, the product is also non-flammable (class 1 fire rating), which adds safety and value to your home. It also helps keep critters where they belong...outside.

ALWAYS 100% EFFECTIVE

Unlike blow-in cellulose or fiberglass, RetroFoam™ will not settle over time, change shape, or break down. Your RetroFoam™ insulation stays in place, particularly at the top of walls where it is most needed. And RetroFoam™ is not affected by moisture. If the foam gets damp, it always dries and remains 100% effective.

INSULATION THAT PAYS YOU BACK

As you can see in the diagram there are numerous areas of your house that air escapes and enters your home. RetroFoam™ eliminates these drafts by sealing plugs, electrical switches, cracks. With energy costs always on the rise, RetroFoam™ will pay for itself by saving you money on your utility bills. RetroFoam™ keeps your home warmer or cooler longer - no need to keep running the heater or A/C.

APPLICATION OPTIONS FOR YOUR HOME

Whatever your building materials may be - inside or outside, we can do it all! Vinyl, wood, brick, block or stone. Call for more information to find out which application would best fit your needs.

- BASEMENT WALLS
- WYTHE CAVITIES
- OUTSIDE WALLS
- INTERIOR WALLS
